## **DETAILED ACTION**

### ***Amendment Entry***

1. The preliminary amendment filed 1/3/05 is acknowledged. Currently claims 1-70 are pending and under consideration.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link claims 1-70 is sample analysis via matrix-assisted laser desorption/ionization (MALDI) where the sample is embedded. However the reference of Li et al. (Rapid Communications in Mass Spectrometry, Vol.8, 1994, pages 743-749) and Wu et al. (Analytical Chemistry, 1994, Vol.66, pages 1637-1645) disclose this special technical feature. Therefore the technical feature recited in claims 1-70 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1641

- A. Group I, claim(s) 1-14 and 50 are drawn to a method of characterizing an analyte by matrix assisted laser desorption ionization (MALDI) mass spectrometry (A 1<sup>st</sup> first method employing a special technical feature).
- B. Group II, claim(s) 15-24 and 51-63 are drawn to a method of measuring cleaved peptide fragments that are capped with a lysine reactive agent (A 2<sup>nd</sup> method that utilizes a special technical feature).
- C. Group III, claim(s) 25-31, 38-42 and 64-68 are drawn to a labeled analyte-compound comprising D-M-L-A. (A 1<sup>st</sup> product used in analyte labeling – another special technical feature).
- D. Group IV, claim(s) 32-37, 43-49, and 69-70 are drawn to a labeled analyte-compound comprising K-L-R and products comprising said K-L-R compound. (A 2<sup>nd</sup> product used in analyte labeling – another special technical feature).

3. The inventions listed as Groups A through D do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Under PCT rules Applicant is entitled to an examination of one of the combination groupings: (1) a product, a method of using said product and a method of producing said product. The instant claims are directed to multiple methods, products, and special technical features; therein applicant must select one for further prosecution.

4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group A through D are not totally inclusive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
